Winter 2021-22

Monitoring the right-of-way

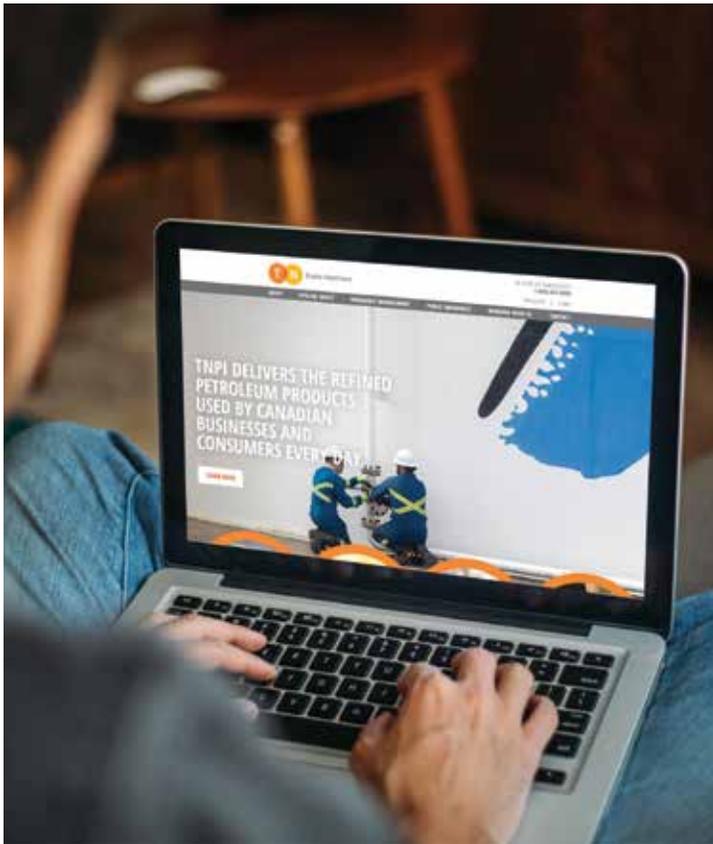

Trans-Northern Pipelines Inc. (TNPI) conducts right-of-way surveillance and monitoring activities on a regular basis, year-round, to help ensure the protection of the public, the environment, and of the pipeline. In Ontario and Quebec, that monitoring can be done by vehicle, by aircraft, or by employee “line walk” of the right-of-way.

Surveillance and monitoring of the pipeline right-of-way helps TNPI identify conditions and activities

on or nearby that could compromise safety, such as construction; land use changes; unauthorized crossings over the pipeline; unauthorized activity such as digging near the pipeline; or even erosion or loss of cover.

Any unexpected findings are recorded and investigated or addressed by TNPI employees.

TNPI’s right-of-way surveillance and monitoring program is part of our commitment to safely operating our pipeline systems.

TNPI updates website home page

If you've visited www.tnpi.ca recently, you may have noticed a new look to our home page.

In addition to refreshing the photos, the new home page allows TNPI to highlight specific content through four features that will be refreshed regularly throughout the year. The two animated maps showing the origination and delivery points for the products that flow through our pipelines have also been brought to a more prominent position on the home page.

Check in during Q1 2022 for more content refreshes throughout the site.

Did you know... The Trans-Northern Pipelines web site has resources just for our landowners? These include an email address (info@tnpi.ca), as well as a landowner survey where you can share your feedback. Visit tnpi.ca/landowners for full details.

What do you think of TNPI Info? Submit your feedback and content ideas to: info@tnpi.ca today!

Important reminders

We *all* play a role in pipeline safety and damage prevention.

CALL OR CLICK BEFORE YOU DIG

Pipelines are recognized as the safest method of transporting refined petroleum products over long distances. Although pipeline leaks are very rare, it's important to know the signs and what to do if you suspect a leak.

If you suspect a leak due to visible flow or pooling of a petroleum product, an unusual oil stain on land or the appearance of a sheen or bubbles in water, the smell of gasoline or oil, or the appearance of dead or discoloured vegetation on or near the pipeline right-of-way...

- Move to a safe location
- Call 911
- Then call our Emergency line at **1-800-361-0608** – available 24 hours a day, 7 days a week

Your safety, and that of the environment, are Trans-Northern's top priority.
