

TNPI launches revised website

A visit to the tnpi.ca website looks a little different these days. In addition to refreshing the full site's look, feel, and images, the navigation menu has been updated and new content has been added to make it easier for those

who live and work near our pipelines, and the community members where we operate, to find information that matters most to them.

[VIEW NEW WEBSITE](#)

CONTENT AND MENU ENHANCEMENTS INCLUDE:

- ❓ Frequently Asked Questions
- ✔️ A SAFETY section that explores not only what TNPI does to safely operate, but also key safety information for people who live and work near our pipelines
- 👤 An updated CAREERS page outlining what TNPI offers to employees, along with an FAQ on how to apply for roles at TNPI and our recruitment process
- 📄 A page dedicated to TNPI reports and publications (including this newsletter) that can be easily viewed online

AND MUCH MORE!

You'll still find an easy contact form and our feedback form on the site, and key information about our operations – they've simply been laid out in a format we feel will be easier to navigate. The new site has also been built with accessibility in mind, and continues to be available in both English and French.

Do you have feedback on the new site, its navigation, and its content? Let us know by using the feedback form or emailing us directly at info@tnpi.ca.

Notification of changes in land use

An important component of damage prevention is understanding how the land is used on and around our pipelines – and being advised early of any plans to change the use of the land in proximity to the pipeline.

Whether it's a municipality, a developer, or a resident or tenant making changes to agricultural activities within 30 metres on either side of the pipeline, it's important to notify TNPI of those changes or plans for making changes.

If you have or are planning to make changes or develop near TNPI's pipeline, please contact us by email at info@tnpi.ca or using the website's contact form, and include details on how best to reach you should we have any questions or require additional information.

IMPORTANT REMINDERS

CALL OR CLICK BEFORE YOU DIG OR CROSS

We *all* play a role in pipeline safety and damage prevention.

Pipelines are recognized as the safest method of transporting refined petroleum products over long distances. Although pipeline leaks are very rare, it's important to know the signs and what to do if you suspect a leak.

If you suspect a leak due to visible flow or pooling of a petroleum product, an unusual oil stain on land or the appearance of a sheen or bubbles in water, the smell of gasoline or oil, or the appearance of dead or discoloured vegetation on or near the pipeline right-of-way...

Shut down any operating machinery and move to a safe location

Call 9-1-1 if required due to fire or visible product

Call our Emergency line at 1-800-361-0608
Available 24 hours a day, 7 days a week

Your safety, and that of the environment, are Trans-Northern's top priority.

Did you know...

The Trans-Northern Pipelines web site has resources for those who live and work near our pipeline?

These include:

- EMAIL ADDRESS
- FEEDBACK SURVEY
